

IBRAHIM GOUMRANE

AI & Software Engineer | Agentic AI & DevOps

Casablanca, Morocco | +212 776 209 303 | ibrahimgoumrane01@gmail.com
www.ibrahimgoumrane.dev | English / French / Arabic

Profile

AI & Software Engineer specialized in **Agentic AI systems, DevOps, and scalable architectures**. Experienced in designing **intelligent orchestration frameworks** using LangChain, LangGraph, and FastAPI. Strong background in **Linux server administration (AlmaLinux, Ubuntu)** and **shared hosting management (Webmin/Virtualmin)**. Proven ability to build and deploy **automation systems, large-scale scraping engines, and AI-driven platforms**.

Professional Experience

Formafast Consulting — Automation & Systems Engineer

Sep 2025 – Jun 2026

- Built a **large-scale web scraping engine** with human-like behavior to bypass anti-bot detection systems.
- Automated **Google search pipelines** for contract data extraction and processing.
- Integrated pipelines with **remote PostgreSQL databases** for logging and persistence.
- Managed servers via **Webmin/Virtualmin**: deployments, SSL renewal, SMTP debugging.
- Maintained and optimized multiple production applications.

OCP Solutions — AI Orchestration Engineer

Mar 2026 – Jul 2026

- Designed an **Intelligent Orchestration Framework** using LangChain, LangGraph, FastAPI.
- Built **agentic workflows** for multi-tool reasoning and automation.
- Ensured low-latency communication between AI agents and APIs.

Top Negoce — Automation Engineer Intern

Feb 2026

- Developed automation workflows using **n8n**.
- Built a **gasoil monitoring system** with automated reporting.
- Integrated APIs and SaaS tools to streamline operations.

EHC — Full Stack & Project Lead

June – Nov 2025

- Led development of a recruitment platform (Spring Boot + React).
- Managed VPS deployment and system monitoring.

FINANCIANA — Full Stack Lead

June – Sept 2025

- Built financial platform integrating AI/OCR and automation.
- Implemented CI/CD and optimized database performance.

Skills

Development & Architecture

- Java, Python, TypeScript, PHP, SQL
- Spring Boot, React, Next.js, Laravel, Express.js
- Microservices, REST APIs, System Design

AI & Agentic Systems

- LangChain, LangGraph, FastAPI
- Agentic AI, Tool-Calling, Multi-Agent Systems
- LLM Integration (OpenAI, Gemini, Llama, vllm)

Automation & Data Engineering

- n8n, Airflow, Workflow Orchestration
- Web Scraping (Selenium, Playwright, BeautifulSoup)
- Data Pipelines, ETL/ELT Processing
- Large-Scale Data Extraction & Processing

DevOps & Systems Administration

- AlmaLinux, Ubuntu Server, Linux Administration
- Webmin, Virtualmin, Shared Hosting Management
- Docker, CI/CD Pipelines, VPS Deployment
- SSL/TLS, SMTP, Email Deliverability Debugging
- Monitoring, Logging, Production Debugging

Databases & Storage

- PostgreSQL, MySQL, MongoDB
- Query Optimization, Indexing Strategies
- FAISS , Milvus (Vector DB)

Cloud & Infrastructure

- AWS, GCP, Oracle Cloud, DigitalOcean, OVH
- Deployment of Multi-Service Architectures
- API Integrations, SaaS Ecosystem Automation

Education

Engineering Degree — Artificial Intelligence & Computer Engineering *2021 – 2026*

ENSAM Casablanca — National School of Arts and Crafts

Relevant Coursework: Machine Learning, Distributed Systems, Data Engineering, Software Architecture
